

Aman Saxena

JAVA J2EE SOFTWARE ENGINEER

PROFESSIONAL EXPERIENCE

PROFESSIONAL BACKGROUND

- Java J2EE Developer with 4.5+ years of experience architecting and delivering scalable, high-performance web applications in the e-Governance domain.
- Experienced in microservices architecture, modern system design, and building end-to-end CI/CD pipelines that ensure high availability and independent deployability.

KEY PROJECTS HANDLED

1. CIPIE

Centre for Intellectual Property & Innovation Exchange - A MeitY Initiative.

Roles & Responsibilities

- Collaborated with a team to develop a robust distributed system orchestrated by Kubernetes in the e-governance domain for CIPIE portal.
- Developed the main Application downstream service of the portal.
- Integrated Kafka for asynchronously handling utility services like email and notifications.
- Built complete end-to-end CI/CD pipeline for the cluster improving system resilience and achieving faster release cycles.

2. NLP MicroGrid

A Kubernetes-orchestrated platform to unify all NLP applications in one portal.

Roles & Responsibilities

- Designed and developed complete Kubernetes cluster to manage NLP downstream services enabling polyglot tech stack.
- Developed a Module Federation host that federates independent UI modules at runtime in ReactJS.
- Deployed OpenTelemetry Framework to capture monitoring data from services and then visualising it through Grafana.
- Built complete end-to-end CI/CD pipeline for the cluster improving system resilience and achieving faster release cycles.

3. Transliteration Engine for Department of Land Resources

An NLP tool to perform machine transliteration. The engine takes in English input and returns transliterated output in any of 22 scheduled Indian languages and vice versa.

Roles & Responsibilities

- Collaborated with a team to develop a robust engine for machine Transliteration in the e-governance domain.
- Handled end-to-end development from backend (Spring Boot) to frontend (ReactJS), and also managed server deployments.
- Proactively managed client concerns, ensuring satisfaction through timely updates, issue resolution, and functional demonstrations.
- Major clients included Department of Land Resources (Government of India) & Election Commission of India.

ORGANISATIONS

**Centre For Development Of
Advanced Computing - Pune**

Project Engineer

(Oct. 2021 to till date)

QUALIFICATIONS

**PostGraduate Diploma in
Advanced Computing (2021)**

Centre for Development of
Advanced Computing, Pune

**B.Tech in Electrical & Electronics
Engineering (2014-18)**

Guru Gobind Singh Indraprastha
University, Delhi

TECHNICAL SKILLS

- Core Java, Spring Boot
- MicroServices, System Design
- MySQL
- Git, GitOps
- Docker
- Kubernetes
- Kafka

ACHIEVEMENTS

Employee of the Month (July,
2022)

PERSONAL DETAILS

DOB: February 25, 1995

Marital Status: Married

Languages Known: English, Hindi

Current Address: B-12, Sterling
Horizon Society, Sus-Pashan Road,
Pune - 411021
